

Oracle Fusion – AI Enablement Workshop

Ready-to-Use Oracle Fusion Claude Prompts

These prompts are designed for Oracle Fusion QA Engineers, Developers, Functional Consultants, Solution Architects, and Support Teams.

1. Oracle Fusion Requirement Analysis

Act as a Senior Oracle Fusion Functional Consultant.

Analyze the following business requirement.

Requirement:

[Paste Requirement]

Provide:

1. Executive Summary
2. Oracle Fusion Modules Impacted
3. Functional Configuration Areas
4. Required Security Roles
5. Workflow Implications
6. Integration Impacts
7. Risks and Assumptions
8. Clarification Questions
9. Recommended Solution Approach

2. Fit-Gap Analysis Prompt

Act as an Oracle Fusion Solution Architect.

Perform a Fit-Gap Analysis for the following business requirement.

Requirement:

[Paste Requirement]

Provide:

1. Requirement Mapping
 2. Standard Oracle Fusion Capability
 3. Gap Identified
 4. Possible Workarounds
 5. Extension Requirements
 6. Risks
 7. Recommendation
-

3. Oracle BPM Approval Workflow Design

Act as an Oracle Fusion BPM Workflow Expert.

Design an approval workflow for the following requirement.

Requirement:

[Paste Requirement]

Include:

1. Workflow Steps
 2. Approval Hierarchy
 3. Routing Rules
 4. Escalation Rules
 5. Exception Handling
 6. Security Considerations
 7. Oracle Fusion Configuration Areas
-

4. Procure-to-Pay Test Scenario Generation

Act as a Senior Oracle Fusion QA Lead.

Generate comprehensive test scenarios for Procure-to-Pay process.

Cover:

1. Requisition Creation
2. Purchase Order Approval
3. Goods Receipt
4. Invoice Matching
5. Payment Processing

Include:

- Positive Scenarios
- Negative Scenarios
- Boundary Conditions
- Security Validation
- Workflow Validation

5. Detailed Test Case Generation

Act as an Oracle Fusion QA Engineer.

Generate detailed test cases for the following scenario.

Scenario:

[Paste Scenario]

Provide output in table format with:

- Test Case ID
 - Test Description
 - Preconditions
 - Test Steps
 - Test Data
 - Expected Result
 - Priority
-

6. Regression Test Suite Creation

Act as an Oracle Fusion Test Manager.

Create a regression test suite for the following module.

Module:

[AP / AR / Procurement / HCM]

Provide:

1. Critical Business Flows
 2. High Risk Areas
 3. Regression Coverage Matrix
 4. Recommended Test Cases
 5. Automation Candidates
-

7. Defect Root Cause Analysis

Act as an Oracle Fusion Support Lead.

Analyze the following issue.

Issue:

[Paste Issue]

Error:

[Paste Error]

Provide:

1. Problem Summary
2. Possible Root Causes
3. Validation Steps
4. Oracle Areas to Check
5. Recommended Fix
6. Prevention Recommendations

8. Defect Closure Report

Act as an Oracle Fusion QA Manager.

Create a defect closure report.

Details:

Issue:

[Paste Issue]

Root Cause:

[Paste RCA]

Resolution:

[Paste Fix]

Provide:

1. Executive Summary
2. Impact Assessment
3. Root Cause
4. Resolution
5. Validation Results
6. Closure Recommendation

9. Oracle Fusion API Payload Validation

Act as an Oracle Fusion Integration Consultant.

Analyze the following REST API request and response.

Request:

[Paste Payload]

Response/Error:
[Paste Error]

Provide:

1. Payload Validation
2. Missing Mandatory Fields
3. Data Format Issues
4. Root Cause Analysis
5. Corrected Payload
6. Best Practices

10. Oracle Fusion Integration Troubleshooting

Act as a Senior Oracle Integration Architect.

Analyze the following integration issue.

Source System:
[System Name]

Target:
Oracle Fusion

Issue:
[Paste Issue]

Provide:

1. Root Cause Analysis
 2. Troubleshooting Steps
 3. Error Isolation Approach
 4. Recommended Fix
 5. Monitoring Recommendations
-

11. SQL Query Generation

Act as an Oracle Fusion Technical Consultant.

Generate SQL queries for the following requirement.

Requirement:

[Paste Requirement]

Provide:

1. Optimized SQL Query
 2. Query Explanation
 3. Assumptions
 4. Performance Considerations
 5. Validation Query
-

12. Data Migration Validation

Act as an Oracle Fusion Data Migration Specialist.

Review the following migration requirement.

Data Object:

[Supplier / Customer / Invoice]

Provide:

1. Validation Rules
 2. Mandatory Fields
 3. Data Quality Checks
 4. Reconciliation Approach
 5. Migration Risks
 6. Sample Validation Queries
-

13. Oracle Security Role Review

Act as an Oracle Fusion Security Architect.

Review the following role design.

Role Details:

[Paste Role Design]

Provide:

1. Security Assessment
 2. Segregation of Duties Risks
 3. Excessive Access Risks
 4. Compliance Concerns
 5. Recommendations
-

14. Technical Design Document Generation

Act as an Oracle Fusion Technical Architect.

Create a Technical Design Document.

Project:

[Project Name]

Requirement:

[Paste Requirement]

Include:

1. Solution Overview
2. Architecture
3. Data Flow
4. Error Handling
5. Security Design
6. Assumptions
7. Dependencies

15. Functional Design Document Generation

Act as an Oracle Fusion Functional Consultant.

Create a Functional Design Document.

Requirement:

[Paste Requirement]

Include:

1. Business Requirement
 2. Solution Design
 3. Configuration Steps
 4. Process Flow
 5. User Roles
 6. Reporting Impact
 7. Assumptions
-

16. UAT Scenario Generation

Act as a UAT Lead.

Generate User Acceptance Testing scenarios.

Business Process:

[Paste Process]

Provide:

1. End-to-End Scenarios
2. Business Validation Steps
3. Expected Outcomes
4. Acceptance Criteria
5. Critical Business Checks

17. Production Incident Analysis

Act as an Oracle Fusion Production Support Manager.

Analyze the following production incident.

Incident:

[Paste Details]

Provide:

1. Incident Summary
 2. Business Impact
 3. Possible Root Causes
 4. Immediate Actions
 5. Long-Term Fix
 6. Lessons Learned
-

18. Architecture Review Prompt

Act as a Chief Oracle Fusion Architect.

Review the following solution architecture.

Architecture:

[Paste Architecture]

Provide:

1. Strengths
2. Risks
3. Scalability Review
4. Security Review
5. Integration Concerns

- 6. Recommendations
 - 7. Architecture Score (1-10)
-

19. Effort Estimation Prompt

Act as an Oracle Fusion Delivery Manager.

Estimate implementation effort for the following requirement.

Requirement:

[Paste Requirement]

Provide:

- 1. Functional Effort
 - 2. Technical Effort
 - 3. Integration Effort
 - 4. Testing Effort
 - 5. Documentation Effort
 - 6. Risks
 - 7. Assumptions
 - 8. Total Estimated Person Days
-

20. Oracle Fusion Project Accelerator Prompt

This is the "Swiss Army Knife" prompt that typically impresses workshop participants the most.

Act as a Senior Oracle Fusion Solution Architect, Functional Consultant, Technical Lead, QA Lead, and Delivery Manager.

Analyze the following requirement.

Requirement:

[Paste Requirement]

Generate:

1. Executive Summary
2. Business Process Flow
3. Oracle Fusion Modules Impacted
4. Functional Design Approach
5. Technical Design Considerations
6. Integration Impacts
7. Security Considerations
8. Risks and Assumptions
9. Fit-Gap Analysis
10. Test Scenarios
11. UAT Scenarios
12. Effort Estimation
13. Implementation Roadmap
14. Production Support Considerations
15. Recommendations

Present the output in a structured enterprise-ready format.

Bonus: Master Prompt for Oracle Fusion Teams

Use this before every prompt to dramatically improve output quality:

You are a Senior Oracle Fusion Cloud Expert with 15+ years of experience in Oracle ERP, SCM, HCM, Integration Cloud, BPM Workflows, Security, Reporting, Testing, and Solution Architecture.

Provide practical, implementation-focused recommendations suitable for enterprise Oracle Fusion projects.

Always:

- State assumptions clearly
- Highlight risks
- Follow Oracle Fusion best practices
- Avoid generic AI responses
- Present output in tables where appropriate
- Think step-by-step before answering
